BETTER BATTING BY THE ENGLISHMEN.

THEIR SECOND INNINGS AT PHILADELPHIA A BETTER EFFORT THAN THE FIRST-HEAD

Philadelphia, Sept. 15 (Special).-Bright, warn cricket game yesterday afternoon, attracted a large wd to the grounds of the Belmont Cricket Club to-day, when the game between P. F. Warner's English team and the Gentlemen of Philadelphia was resumed. A splendid wicket was ready for the visitors when play was continued, but the batsmen could make no stand against the bowling of B. King, and the whole side was dismissed for a miserable total of 63 uns. King's bowling proved almost marvellous. He took nine wickets for only 25 runs, and even assisted in the disposal of the wher. No such work was ever before accomplished in this country by any bowler in an inter-national match, and the young Belmont man came in for general congratulations after the game.

The Englishmen had, of course, to follow their innings with the startling deficit of 115 runs facing nings with the startling deficit of 115 runs facing them. They went about their task nobly, however, and after Chinnery had been disposed of for 8. Warner and Hemingway got together, and before they were separated they advanced the total to 123. Hemingway hit vigorously for 55, while Warner played steadily and well for 51. G. L. Jessop next had a short and merry inning for th. in the course of which he made one of his characteristic big drives for 6, and with the total at 157. J. R. Head, who had previously been playing in steady form, was joined by Leveson-Gower.

This pair immediately proceeded to make things extremely lively for the fielders, and, although Captain Brockle of the Philadelphians changed his boxiters frequently, they appeared to make no impression on the batsmen. Head, who seldom gives vent to hard hitting, appeared to take kindly to the delivery of Cregar, and hit him to the ropes thrice in succession. Both men hit freely, and when stumps were drawn for the day, the total score had advanced to \$22, and both men were still in. They will resume batting on Monday morning, and as Head lacks only 15 runs of a "century," he is likely to get one. nings with the startling deficit of 179 runs facing

RESTOCKING PINE LANDS FEASIBLE. Madison, Wis., Sept. 25.-At a meeting of the State Forestry Commission held here reports were heard from several of the inspectors who have been "cruising" through the timber country in the northern part of the State. The reports are highly favorable to the proposed plan of restocking land with the timber. Dr. Fernow, head of the Government Forestry Department, stopped on his way from San Fanaisco to Chicago to meet with the Board. He,

with Chairman Burrows and Secretary Chency of the Commission, are convinced that the pine lands can be made to produce a second growth of timber. Members of the Board will shortly visit Ashiand and Taylor counties with a view to beginning work in that section. Another meeting will be held Octo-ber 16.

DESTRUCTION OF SHEEP CAMP.

FURTHER DETAILS OF THE DISASTROUS

LANDSLIDE IN WHITE PASS. Port Townsend, Wash , Sept. 25 .- The tug Pioneer Captain Nellson, arrived here yesterday morning direct from Skaguay, with the news of the land glacier slide on the Dyea trail last Saturday, which was accompanied by the loss of the lives of several people, the exact number not being known. Eighteen in all, seventeen men and one woman, were reported missing.

The accident is described by some as a snow slide, by others as a landslide and by others as the tearing loose by the rains of a huge glacier that overhung Sheep Camp and the trail. The news reached Skaguay Sunday evening, and Ploneer left there at 3 o'clock Monday morning. William Sprague, brother of Captain Sprague, of the tug Sea Lion, was a passenger on the Fioneer, and he tells the following story of the destructive

I heard the news of the slide on Sunday ever ing from a woman who claimed to have with it. The accident was caused by the rain. I the first part of the week it was cold and ice had formed all around. On Thursday a change came and Thursday night and Friday morning was a warm rain, accompanied by a chinook wind, which thawed everything. The rain came down in torrents, the worst storm of the year for that section, and continued all Friday and Saturday forenoon. About noon on Saturday the slide came, striking the Dyea trail at Sheep Camp, and

carrying all in its path. Sheep Camp was literally wiped out of existence. Fortunately there were not many people there. Each one left his outfit and bag behind and for life. Some were caught in the deluge. Just how many may never be known, but eighteen were missing altogether. Two of them were a man and his wife named Crockett, I believe, who were running a restaurant at Sheep Camp. Only one body has been found. It was that of Choynski, a cousin of the prize-fighter. He was found a quarter of a mile from where he had been camped on the trail and was in a terrible condition when discovered. His body, which was mangled, was in a horrible condition, but he was not dead. He suffered agony and died within a short time after being found. Four or five other missing men were Indian packers, and one of them is reported to have had \$4,000 on him, and was just starting out for Dyea when the slide There is great excitement along the traff and at Dyea and Skaguay over the report of the big slide, and it was reported that fifty persons had been killed, but the facts are as I have stated them

Charles Finn, assistant engineer of the Pic Charles Finn, assistant engineer of the Ploneer, confirms the story. Finn believes that one of the glaciers which are to be seen hanging along the mountain sides was washed out by the heavy rains and that it came crashing down the hill. Just before reaching the trail and Sheep Camp, this glacier swept through the lake at the foot of one of the hills, and the lake and its waters followed the glacier and numerous bowlders as they crashed along through Sheep Camp. Finn is certain that at least seven were drowned or crushed in the slide. He says there is consternation at Dyea and Skaguay over the report of the accident, and it will deter hundreds from trying to make it across this year. "I was told that the Skaguay trail was literally obliterated, and there was no use trying to get over it again this year." Charles Tinsley, chief engineer of the Pioneer talked with an Indian who witnessed the avalanche at Sheep Camp. The Indian was much excited, and Tinsley thinks only a few were killed. Captain Nellson of the Pioneer describes the rainstorm of last week at Skaguay as the worst he ever witnessed. It came down in torrents, and there was a foaming mass of water pouring down the mountain sides at Skaguay, the mud and slush being four feet deep, where a few weeks ago the ground was as hard as a floor. Captain Nellson asserts that the Skaguay trail was entirely obliterated by the storm of last week, and is now being abandoned by every one there. confirms the story. Finn believes that one of the

SERGEANT SHOOTS A PRIVATE.

THE MEN HAD QUARRELED AT SACKETT'S HAR-

BOR ABOUT TWO WOMEN.

Watertown, N. Y., Sept. 25 .- An attempt to m der was made at Madison Barracks, Sackett's Har-bor, last night. Sergeant John E. Heck, of Com-pany H. 9th Infantry, shot Edward H. Brown, a pany H, 9th Infantry, shot Edward H. Brown, a private of the same company. The shooting took place in the quarters of Company H. Yesterday morning the men had a dispute about two women whom Brown had at the barracks. Sergeant Heck went to the village of Sackett's Harbor and borrowed a revolver. When he returned to the barracks Brown was lying on his bunk. Some words passed between them, and Heck drew the revolver and shot Brown, the ball passing through his leg near the groin. Heck then went to the Officers Club, threw the frearm down on a billiard table and said: "I have shot a man and want to be put in the guardhouse." He was placed under arrest. Brown was removed to the hospital, and may die.

THE SITUATION IN NEW-ORLEANS.

TWO DEATHS AND TWELVE NEW CASES. THE WEATHER CONTINUES COOL AND THE

New-Orleans, Sept. 25-Two deaths from yellow fever have occurred here to-day. There have been twelve new cases.

The weather continues cool here. As stated be ore, cool weather is dangerous in the cases of those who are ill, and the physicians think it is increasing the death rate, which now approximates 16 per cent.

The Beauregard School is being got into shape for

the reception of yellow feyer patients. Threats continue to be made by angry citizens, but so large a force guarded the building last night that there was no opportunity for any one to apply the torch. Mayor Flower has received numerous offers from citizens to do guard duty.

The Board of Health and the mercantile commu nity are receiving encouraging reports from various towns which have quarantined against New-Orleans, announcing relaxation of quarantine regulations. Dr. Montluzin, who is to be prosecuted by the Board of Health for his failure to report the Dreyfus case, which terminated fatally, says that he informed the Board as soon as he had completed his diagnosis. The law, however, provides that every case as to which the least suspicion exists shall be reported, and this law is to be brought into operation in the prosecution of Drs. Holt and Mont luzin.

Commercial people have written to Governor Foster asking him to use his good offices in securing a modification of quarantine regulations. The Gov-

ernor will act in the premises.
Dr. Summers, of St. Louis, who was sent by the Dr. Summers, of St. Louis, who was sent by the Tennessee Board of Health along the yellow-fever district to study the prevailing disease, spent the day in this city yesterday, and started for home last night. He said he did not see any reason why last night. He said he did not see any reason why he should spend more time here, as he found the cases to be similar, and all of the same mild character. He repeated his statement that the fever acter. He repeated his statement that the fever was the mildest that he has ever seen. Dr. Summers said that he had answered all telegrams received by him, saying there was no danger here, that the disease was too mild, and persons having business here might safely come.

At Ocean Springs there are eleven old cases of fever under treatment, and one new case was reported yesterday. No deaths.

Screnton, Miss., reports three new cases with no deaths there or in East Pascagouia.

At Blook, Miss., Mayor H. L. Howard has been taken down with the fever He is overworked, having devoted his energies to fighting the fever, having devoted his energies to fighting the fever from the sick are all favorable. AN APPEAL FROM BILOXI.

Mayor Strong has received a letter from the Common Council of Biloxi, Miss., asking for aid for the yellow fever patients in the town. The appeal, which is addressed to the public and is signed peal, which is addressed to the public and is signed by the Mayor of the town and the Councilmen, says that, as a consequence of the yellow fever prevailing in the city, the factories and other places of industry there have been closed. In view of this, all the laboring people are idle, and in case they are taken ill they have not the money to pay for medicines. As nearly all the sick are poor, aid is asked in order to raise subscriptions to care for them. The poor persons who are well will be taken care of at camps of detention and other places. The appeal is made only for the sick in the town who have no means.

Cafferty is said to have been a former New-York Park policeman, who had been in the hop country picking hops. He purchased some clothing in Binghamton Monday, and this was a means of his identification.

SHOULD ACT AS A UNIT.

From The Hackensack Republican.

Essex County always falls to elect a delegation united upon any Essex County man for Governor. If the Republicans there want the next Governor to hall from that county, they can most likely bring about that result by sending to the next nominating convention a solid and earnest delegation for Franklin Murphy. It would do them no harm to try the experiment of union and harmony once, any way.

CHURCH SPLIT BY GOSSIP.

TALK CAUSES TROUBLE IN ST. STEPHEN'S CONGREGATION, TOTTENVILLE, S. I.

There is trouble in the congregation of St. Stephen's Episcopal Church, Tottenville, Staten Island, which has livided the church into two fac-The cause is the dismissal of two of the Sunday-school teachers. They were removed by the pastor, and their dismissai, it is said, has led resignation of other teachers and officers of the church.

The Rev. Mr. Welham is the pastor. He is about thirty-two years old, and has been in charge of St Stephen's Church for two years. He was popular until a short time ago, when some of the members rose in opposition to him. It is reported that these members of the congregation thought the pastor called too much at the house of one of his woman perishioners. The Rev. Mr. Welham admits that he visited at the house in question, and says the trouble

classes from them. This they denied.

The young minister said that the whole trouble was caused by the gossipping of some of the women members of his parish, who were old enough to have more sense than to tell stories reflecting upon his character because he spent some time with a at an end; that he proposed to "read out" other members who belonged to the King's Daughters which is an auxillary to the church. Miss Herrell, which is an auxiliary to the church. Miss Herrell, the deposed teacher, is a member, and her sister. Miss Kate Herrell, is also to be asked to resign from the circle. The Rev. Mr. Welham denies absolutely that the dismissal of the teachers was made in a public manner in the Sunday-school, and says that he did it in a quiet way. He also said that Miss Minnie Slatght, another one of the teachers, and William Meyers, the librarian of the Sunday-school, who are in sympathy with the deposed teachers, had resigned. His course, he said, has been approved by the vestrymen.

posed teachers, had resigned. His course, he said, has been approved by the vestrymen.

Mrs. Charles Highle, when seen by a reporter at her home in the Amboy Road, said she had been connected with the church for many years, had been a member of the choir, and until recently the treasurer of the Teachers' Guild, to which place she was appointed by the pastor. Mrs. Highle said that much of the church trouble was caused by a personal dispute between herself and Mrs. Washington, the wife of Dr. Walker Washington, a well-known Tottenville physician, in which the young minister championed the cause of Mrs. Washington. This, Mrs. Highle thought, was out of place, as Mrs. Washington had a husband to defend her if it became necessary.

Mrs. Washington had a husband to defend her if it became necessary.

Mrs. Highle says she is at a loss to understand the actions of the Rev. Mr. Welham, as he had always praised her for her church work and compilmented her efforts to do good work in both the Sanday-school and the church. She also declares that her husband, who, she said, is of athletic build, would look after the young minister when he returns from a tricks the Wast. S. Hernes, of Tottenville, has also resigned on ac-count of the present trouble.

Mrs. Highle denied positively having circulated any stories about the minister.

NEW MEDICAL DISCOVERY.

A Positive Cure for Dyspepsia. This may read as though we were putting it a little strong because it is generally thought by the majority of people that Dyspepsia in its chronic form is incurable, or practically so. But we have long since shown that Dyspepsia is curable, nor is it such a difficult matter as at first appears.

curable, nor is it such a difficult matter as are first appears.

The trouble with Dyspeptics is that they are continually dieting, starving themselves, or going to opposite extremes, or else deluging the already overburdened stomach with "bitters," "after dinner pills," etc., which invariably increase the difficulty even if in some cases they do give a slight temporary relief. Such treatment of the stomach simply makes matters worse. What the stomach wants is a rest. Now, how can the stomach become rested, recuperated now can the stomach become rested, recuperated and at the same time the body nourished and

sustained?
This is the great secret and this is also the secret of the uniform success of Stuart's Dyspepsia Tablets. This is a comparatively new remedy, but its success and popularity leave no

Herrell, the daughter of Jacob Herrell, one of the oldest residents in Tottenville, and Mrs. Charles Highbie, wife of a well-to-do New-York business man. A week ago each received a letter from the pastor, which stated that they could no longer be useful in his Sunday-school, and that he had decided to take their classes from them.

The Rev Mr. Weiham was seen yesterday at his home, in Bentley-st. He refused to make known his reasons for his action, except to say that he was justified, and that he regarded it as best for every one that he did not make known the reasons for having dismissed the young teachers. He said that he had explained to the women in the letters he had written to them why he had taken their classes from them. This they denied.

The Tablets will digest the food any way, regardless of condition of stomach.

The sufferer from Dyspepsia according to directions is to eat an abundance of good, whole-some food and use the tablets before and after each meal, and the result will be that the food will be digested no matter how had your dyspepsia may be, because as before stated, the tablets will digest the food any way, regardless of condition of stomach.

The sufferer from Dyspepsia according to doubt as to its merits.

The Tablets will digest the food any way, regardless of condition of stomach.

The sufferer from Dyspepsia according to directions is to eat an abundance of good, whole-some food and use the tablets before and after each meal, and the result will be that the food will be digested no matter how bad your dyspepsia may be, because as before stated, the tablets will digest the food even if the stomach is wholly inactive. To illustrate our meaning plainly, if you take 1,800 grains of meat, eggs or ordinary food and place it in a temperature of 188 degrees, and the result as the state of the stomach is wholly inactive. To illustrate our meaning platiny, if you take 1,800 grains of meat, eggs or ordinary food and place it in a temperature of 188 degrees, and the result as the state of the st

The stomach may be ever so weak yet these tablets will perform the work of digestion and the body and brain will be properly nourished and at the same time a radical, lasting cure of dyspepsia will be made because the much abused stomach will be given, to some extent, a much needed rest. Your druggist will tell you that of the many remedies advertised to cure dyspepsia none of them has given so complete and general satisfaction as Stuart's Dyspepsia Tablets and not least in importance in these hard times is the fact that they are also the cheapest and give the most good for the least money.

ONLY \$7,500 FOR JOHN ROBERTS.

STATE AWARD IN THE CASE OF A PROSPEROUS MAN WRONGLY CONVICTED OF BURGLARY.

Albany, Sept. 25 .- The State Board of Claims to day awarded to John Roberts, of Brooklyn, \$7.500 damages for false imprisonment. He had made a claim for \$168,956. In making the award the Board of Claims says that it takes as a precedent the decision of the old State Board of Audit in giving to Terence O'Neill Donnelly, in 1879, the sum of 18.600 for false imprisonment, which award was ratified by the Legislature as being just. John Roberts, now fifty years old, and living at

informing him of the location of the dynamits. The Mayor promptly turned the letter over to Chief Foley, and he sent Policeman Riley out to investigate the story.

The policeman found the dynamite in a box he a clump of burshes, and all except one corner of he was underground. He returned to headquarters with this information.

After consideration of the case it was decided to get rid of the dynamite, and it was given to William II. Pugsley, a contractor, who removed it to his office.

There are about twenty houses within a hundredyard radius of where the dynamite was found, and the amount was sufficient to have wrecked all of them had it exploded.

How the dynamite came where it was found to a mystery, but it is believed by some that it was used by contractors at a stone quarry near by. The quarry has not been worked in the last two years, and it is supposed that the dynamite was left behind when the workmen went away.
